Extremely Strong Design

The DFC Push Bumper Series is designed with maximum safety in mind, providing the best strength, durability, and protection. Components are manufactured with HRPO steel engineered to provide extra protection to the grille and front end.

Ease of Installing and Customization

The DFC Push Bumpers are quick and easy to install with no drilling required. The side uprights are pre-drilled for installation of MicroPulse® series lights for added side warning. The DFC Push Bumper Series offers a unique center bar with dual-speaker mounting locations for ease of installation and serviceability. Optional pre-drilled lower guards allow for additional lighting using MPS6U lights. Solid, two-light, and four-light top channel options are available for further customization. Two-light and four-light top channels utilize MPS6U lights, sold separately.

Push Bumper

This DFC Push Bumper is made of seven-gauge steel uprights, with (2) 1-1/8-inch wide rubber strips and a lower C-channel, to provide extra protection and strength. The uprights are pre-drilled for the addition of lower guards, and the center bar allows for easy mounting of speakers and additional accessories. The black, textured powdered coat on the push bumper provides added resistance against scratches and scuffs.

Top Channel Options

The DFC Push Bumper Series offers three top channel options:

- Solid top channel
- Two-Light top channel for use with MPS6U lights (lights sold separately)
- Four-Light top channel for use with MPS6U lights (lights sold separately)

Solid Top Channel

Two-Light Top Channel

Four-Light Top Channel

Two and Four-Light Top Channels come in (2) pieces, allowing the ease of installing MPS6U lights

Lower Guard Options

The lower guards are made of heavy-duty seven-gauge steel horizontal bars. DFC Push Bumper Series lower guards are designed to bolt directly to a DFC Series Push Bumper for the best PIT maneuver possible.

Upper Guard Option

The upper guard option offers additional protection to the front end as well as headlight protection. The upper guards are made from eleven-gauge galvanized steel that is treated with a textured powder coat for protection against rust. The upper guards bolt directly to the push bumper and lower guards, allowing for an easier installation.

Wire Cover Option

Wire Covers are available for the Ford F-150, Ford Police Interceptor Utility, Dodge Durango and Chevrolet Tahoe.
