- Black bezel included; optional Chrome or White bezel available
- MPSW9-RBW model available with a smoked lens
- Five-year warranty

Federal Signal is pleased to announce the release of our new Tri-Color MicroPulse® Wide Angle 9. MicroPulse Wide Angle 9's curved design and powerful LEDs provide an impressive 180-degree light spread. These perimeter lights are ideal for mounting on push bumpers, rub rails, side mirrors, and spoilers of first responder and work truck vehicles.

MicroPulse Wide Angle 9 tri-color models are FSJoin™ compatible. FSJoin is a programming compatibility feature of Federal Signal's light bars and exterior/interior warning lights that work in conjunction with a Convergence Network siren or controller. When using FSJoin products, the Convergence Network siren/light controller controls all of the vehicle's warning light flash patterns, dimming feature, and light head syncing/alternating patterns.

The Red/Blue/White MicroPulse Wide Angle 9 tri-color model is also available with a smoked lens. The dark tinted polycarbonate lens makes this model the optimal choice for undercover applications.
