

To properly install this light, you must have a good understanding of automotive electrical procedures and systems, along with proficiency in the installation and use of safety warning equipment.

To +VDC (fuse @ 2A).....**RED (Bright)**  
To +VDC (fuse @ 2A).....**WHITE (Dim)**  
To Vehicle Ground.....**BLACK**

### Mounting:

1. Create a Ø7.00-inch hole on the selected mounting surface.
2. Make all wiring connections.
3. Mount light using supplied hardware.
4. Test for proper operation.

### Modes of Operation:

Each unit has two modes: Dim and Bright.

#### Operating in Dim Mode:

With the black wire connected to vehicle ground, connect the white wire to + 12 volts to illuminate the light in Dim Mode.

#### Operating in Bright Mode:

With the black wire connected to vehicle ground, connect the red wire to + 12 volts to illuminate the light at full intensity (bright).

**NOTE:** Bright Mode has priority over Dim Mode.
